SKILLS SUMMARY

-
- **Languages:** Python, Java
 - **Tools:** Jupyter Notebook, Vscod
 - **Platforms:** Windows, Arduino

INTERNSHIP

-
- **Intern – Hindustan Aeronautics Limited (HAL) :**

July 2025 – August 2025

Completed a 1-month internship with exposure to multiple departments of aircraft manufacturing. Gained experience on understanding of assembly processes, including structural alignment and quality inspection procedures. Learned about Looms & Final Assembly operations, including integration of systems, sub-assemblies, and testing procedures. Observed practical applications of aerospace manufacturing, precision engineering, and quality assurance standards.

PROJECTS

-
- **ROV – Remotely Operated Vehicle for Underwater Surveillance** : Built an underwater ROV equipped with a waterproof camera, thrusters, and remote controls to perform surveillance and exploration tasks. Role : Designed control systems and programmer
Engineered the watertight enclosure and handled the wiring and signal routing for underwater conditions.
Programmed microcontroller logic for motor control, lighting, and video signal transmission. Focused on stability in underwater movement and real-time operator feedback through visual monitoring.
 - **OAV- Obstacle Avoidance Robot** : Designed and built a robot capable of detecting and avoiding obstacles using ultrasonic sensors and Arduino microcontroller. Role : Hardware designer and programmer

VOLUNTEER EXPERIENCE

-
- **Volunteer – IEEE Event:** Contributed to event organization and logistics, assisting with session coordination, registration, and on-site support.
 - **Assisted in Setting Up a Departmental Exhibition** : Contributed to the planning and setup of a departmental exhibition by arranging displays, managing materials, and supporting smooth execution.
